

November 08, 2004

To whom it may concern:

As a business class high-speed Internet service provider Terago network Inc has a need for skilled contractors to provide cost efficient maintenance and installation services in a varied environment. Net Check has for the last two years provided this service.

I find them highly motivated and professional with strong technical skills and a dedication to the job ensuring a high quality of work.

They assist in preplanning and provide input to identify problem areas as well as provide clear, concise and accurate details on network builds and rearrangements.

Net Check staff use the latest tools and equipment when working on the Terago network.

Their service and expertise has surpassed expectations.
I would recommend Net Check without hesitation.

Sincerely

Gary Norton
Field Service Manager
Terago Networks Inc
