To whom it may concern:

I have been associated with NET CHECK for more than 1 year and find them to be highly motivated and very professional in all aspects of their business.

They follow plans and instructions with very limited supervision and keep everyone involved in the job up to date as required.

Their daily job logs and weekly time sheets are clear, concise, accurate and presented on time.

They are well trained and knowledgeable and are quick to identify potential problems and suggest solutions during pre-planning sessions and on job walk previews.

They have access to all the latest tools and equipment required to place, terminate and test all of the wiring and hardware associated with today's telecommunications networks.

Their dedication to the job is evident in their flexibility to work anytime day or night to complete an assignment.
